EHS Risk Assessment Form

Risk Assessment Guidance

Rating	Impact/ Severity (Consequence)
1	Insignificant – No potential environmental pollution, health effects or injuries.
2	Minor – A minor environmental pollution, health effect or simple injuries that can be handled in the workplace without further external assistance.
3	Moderate – A limited environmental pollution, temporal / acute health impact or medium – level injuries that may partially / temporarily halt work and require external assistance and the provision of specialized medical services resulting in loss of no more than (7) workdays to recover.
4	Major – A critical environmental pollution, / chronic / permanent health effect or serious injuries that completely stop work and necessitate external assistance and the provision of specialized medical services resulting in loss of more than (7) workdays to recover.
5	Catastrophic – An incurable environmental pollution or death that completely halts work and necessitates external assistance.

Rating	Likelihood (Probability)
1	Very Unlikely – There is no precedent in previous similar facilities, operations, activities or tasks.
2	Unlikely – There is no precedent recorded in UAE, but it was recorded at least once in previous similar facilities, operations, activities or tasks abroad.
3	Probable – There is at least one precedent recorded in similar facilities, operations, activities or tasks in UAE over the last 3 years.
4	High – There is at least once precedent recorded in the same facilities, operations, activities or tasks in the Institution over the last 3 years.
5	Frequent – There are frequent accidents recurrence recorded in the facilities, operations, activities or tasks in the Institution over the last year.

EHS Risk Assessment Form

Likelihood (Probability)	Severity (Consequences)				
	Significant (1)	Minor (2)	Moderate (3)	Major (4)	Catastrophic (5)
Very Unlikely (1)	1	2	3	4	5
Unlikely (2)	2	4	6	8	10
Probable (3)	3	6	9	12	15
High (4)	4	8	12	16	20
Frequent (5)	5	10	15	20	25

Risk Rating	Required Actions
Low (1 – 3)	Operations, activities or tasks can be carried out by the current procedures
Moderate (4 – 6)	Operations, activities or tasks can be maintained along with recommending the provision and implementation of other additional measures or procedures.
High (8 – 12)	Operations, activities or tasks can be maintained; however, they necessitate providing obligatory additional measures and procedures to control and handle within a specific period of time, while they are continuously monitored until additional measures and procedures are met, complete and re-evaluated. Operations, activities or tasks shall immediately cease function, if obligatory additional measures and procedures are not provided or achieved within the specified time agreed to.
Catastrophic (15 – 25)	Operations, activities and tasks shall not be initiated in the current situation. It must cease immediately until they are reconsidered as well as taking necessary control measures and procedures and carrying on re-evaluation for impacts and risks.
